MYSELF

On warfarin?
Tired of waiting?

*Read how to transform your life
with CoaguChek® INRange - a
portable, self-monitoring device*

* Terms and conditions apply.

CoaguChek®

**Why wait?
Test yourself...**

Taking warfarin needn't cause inconvenience or disruption to you daily life

If you are on long-term warfarin, then you will be having your blood tested regularly by a healthcare professional to monitor your blood coagulation (your INR*). This usually means travelling to an anticoagulation clinic - causing disruption, inconvenience and expense.¹

The good news is that there is another way!

The **CoaguChek® INRange** meter is an easy-to-use, portable, self-monitoring device.

After a simple prick of your finger, the **CoaguChek® INRange** meter enables you to self-monitor your INR at home or away, such as when you go on holiday or at work.

It's simple, and only takes a few minutes.

*INR: International Normalised Ratio

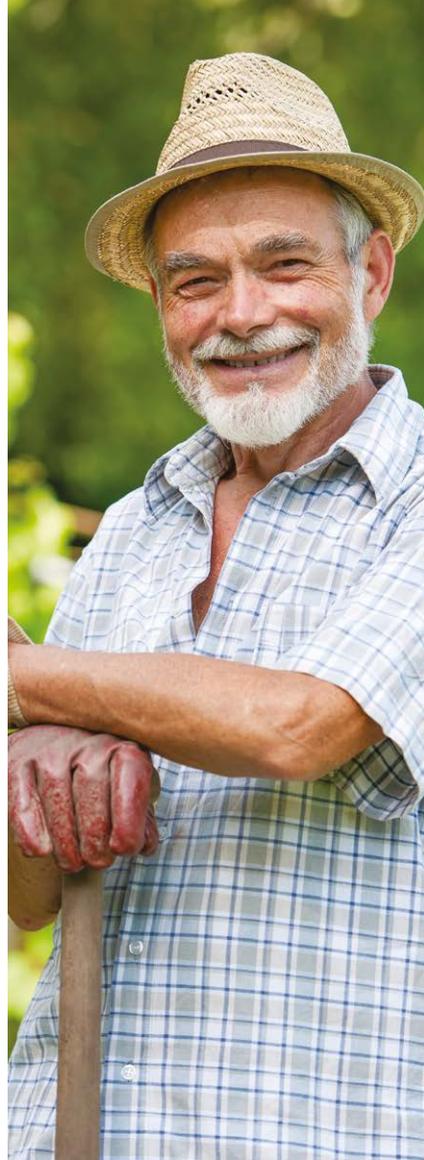

For more information, call the CoaguChek® Care Line free on **0808 100 7666** (UK), **1 800 992 868** (Republic of Ireland) or visit **shop.coagucheck.com**

Monitor your INR levels anytime, anywhere¹... with CoaguChek[®] INRange

-  The **CoaguChek[®] INRange** meter is a handy and easy-to-use portable device
-  Test strips are required. Six test strips are provided to get you started and further test strips are available on prescription (subject to your GP's discretion)
-  **CoaguChek[®] INRange** has a proven level of accuracy and precision that correlates closely with a laboratory test^{2,3}
-  Plot your results in graphical formats, set reminders to take a test and add comments to individual tests
-  **New!** Stay connected - The CoaguChek INRange meter can be connected via Bluetooth to an App that sends your result directly to your clinic. App connectivity is available in areas where the anticoagulation clinic has signed up to receive results in this way. If you prefer you can still use the INRange meter without App connectivity.

So, instead of having to make time consuming trips to your clinic, or taking time off work, you will only need to travel as far as the drawer or bag you keep your meter in - saving you time and expense.¹

For more information, call the CoaguChek[®] Care Line free on **0808 100 7666** (UK), **1 800 992 868** (Republic of Ireland) or visit shop.coagucheck.com

*Why spend time
waiting when you
could be getting on
with your life?*

It's easy to test yourself...

NICE
recommended⁷

See how CoaguChek[®] could improve your life

- Enjoy greater independence and quality of life^{† 4,5}
- Save time and money associated with clinic visits[†]
- Have an improved feeling of wellbeing^{† 4}
- Reduce your risk of stroke, bleeding or clots⁶

The number of clinic visits should greatly reduce over time to once or twice per year (depending on your clinic's protocol) as you rely more on your **CoaguChek INRange** meter.

Who is suitable for self-monitoring?

Anyone on long-term warfarin with reasonable eyesight and manual dexterity may be suitable for self-monitoring. There is no age limit.

A carer can also support self-monitoring. NICE (the National Institute for Health and Care Excellence) has published guidance recommending self-monitoring with **CoaguChek**.⁷

Self-monitoring may not be suitable for everyone and you should seek advice from a healthcare professional to discuss.

“I’m really glad that I asked about self-monitoring. I genuinely do feel in control.”

Real-life experience
